## SUPERINTENDENT'S REPORT.

---

*Board of Administration, Springfield, Ill.:*

GENTLEMEN—I have the honor of submitting to you the thirty-first biennial report of the Illinois School for the Blind, it being for the term ending June 30, 1910.

### ATTENDANCE.

The number of pupils enrolled during the period was 229, and the average attendance was 190. This is a few less than were enrolled during the preceding year, but the average attendance is slightly greater. The net cost to the State, based upon the average daily attendance for last year, was \$288.00, which is a little less than the average expenditures for schools of this kind in northern states. Seventeen schools located in California, Colorado, Connecticut, Indiana, Iowa, Kansas, Maryland, Massachusetts, Minnesota, Missouri, Nebraska, New York (two), Ohio, Pennsylvania (two), and Washington averaged in 1908 \$294.00 per capita. This is based upon enrollment and not average attendance. It will be seen that our per capita cost of maintenance is not excessive, being below the average. The ordinary fund for the next term, including library and printing office supplies, should be \$57,000.00 a year, or \$114,000.00 for the two years.

### DISPOSITION OF SPECIAL APPROPRIATIONS.

The last Legislature appropriated for special purposes for two years the following:

Alterations and remodeling for protection against fire and the better accommodation of pupils.....	\$12,000 00
Renewing heating system in three buildings.....	1,500 00
Repairs and improvements.....	7,000 00
Printing department .....	1,000 00
Maintenance of teachers' library.....	1,000 00
Maintenance of free circulating library for blind.....	1,000 00

The \$12,000.00 for remodeling old buildings has been expended for new maple floors, new ceilings, additions, etc., in three buildings. By the new arrangements which were made possible by the expenditure of this fund, sixty pupils were taken from dormitories on the third floor of the main building and given comfortable and safe accommoda-

tions in cottages. There is now a cottage for little boys and another for little girls. These accommodations enable us to separate the little folks from older pupils and has made their surroundings more agreeable and home-like. New porches for these cottages will soon be erected and so will further add to the comfort of pupils.

The remainder of the fund will be expended for tile floors and iron stairways. These improvements will give a further guarantee of safety to our pupils in case of fire.

The sum appropriated for the renewal of the heating system enabled us to put in the Paul system of heating with new radiators and connections in three buildings. The heating of nearly all of the ten buildings is now under the Paul system, which enables us to make every room on the grounds comfortable in the most severe weather.

The repairs and improvements fund has all been expended, with the exception of a balance of \$201.64. All metal roofs and many rooms in various buildings will be painted this summer, and with the laying of the new floors contemplated the fund will be exhausted by the end of the term.

The regular appropriation of \$1,000.00 for the printing office has been expended as directed. We do not only undertake to supply our own pupils with printed matter, but we accommodate schools and individuals in need of books and music we print. The receipts from the printing office, which have been turned into the State treasury with other collections, amounts to about \$700.00 per year. The appropriation of \$1,000.00 therefore enables us to return to the treasury about \$1,400.00 in the two years, besides supplying our pupils with a large amount of matter printed in Braille.

For the maintainance of the teachers' library and for school apparatus \$1,000.00 was appropriated. This has been used as directed, with the exception of \$97.06, which will be needed for apparatus at the opening of school this fall. The library is a most valuable aid to our teachers in securing reading for pupils and preparation of lessons.

#### SPECIAL APPROPRIATIONS NEEDED.

The next biennial term will require the following regular special appropriations:

Repairs and improvements for one year, \$3,500.00, or \$7,000.00 for the term. This fund keeps up the repairs on the buildings, which are all quite old and therefore require considerable attention to keep in a satisfactory condition. It also takes care of all our painting, repairs on heating plant and plumbing, as well as the necessary improvements of the grounds. The sum of \$3,500.00 a year is none too large for this purpose, indeed, it might be economy to increase the fund to \$4,000.00 to the advantage of the best interest of the school.

The Forty-fifth General Assembly passed an Act establishing at the school a circulating library, and appropriated \$2,000.00 for the purpose of purchasing books, and the Forty-sixth General Assembly appropriated \$500.00 annually to continue the work. There are now 283

patrons of this library, not counting the pupils enrolled in school. The circulation is increasing and now amounts to ten or twelve books a day. The library contains 1,593 volumes.

A law passed by Congress April 27, 1904, gives reading matter for the blind free transmission through the mails under regulations prescribed by the Postmaster General. These regulations may be found on the first page of the ink printed and Braille catalogues, which are for distribution to all who desire to make use of the library.

This library has brought light and good cheer into the lives of many that would have otherwise remained in darkness and I therefore recommend that an appropriation of \$500.00 annually be made to purchase more books and defray the expense of care and sending out to readers those now upon our shelves.

#### NEW SPECIAL APPROPRIATIONS.

There should be an appropriation to complete the new hospital, which was started by an appropriation of the Forty-fifth General Assembly. As it is now, the hospital accommodates but ten patients. This is not adequate for our needs on many occasions. When a contagious disease occurs, we have not a place to isolate the patient, and during the past year have had to care for pupils with scarlatina in the wagon barn. With an appropriation of \$10,000.00 the building can be completed with an isolation ward on the upper floor that will meet the needs of the school for many years to come. The plans for this structure were made in the beginning, but only so much of it was erected as could be paid for with the appropriation made. The architect's estimate for its completion is \$10,000.00.

The State has twenty-five acres of very rich land which has been used for many years as a pasture. We should plant five acres of this in corn for ensilage, which would furnish our cows with good feed for six months when there is but little pasture. We have teams and help sufficient to do the work without employing more. The expense of a silo will not be a large sum. It would have a capacity for sixty tons and would be 12 feet in diameter and 28 feet high. It would pay for itself in two years, and I recommend that \$600.00 be appropriated for the construction of a silo and the purchase of the necessary machinery.

The mangle in our laundry was purchased more than twenty years ago. It was secondhand when it came into our possession and has had constant use since. It is now impossible to keep it in repair and I recommend that \$500.00 be appropriated for a new one.

The smokestack is apparently in a very bad condition. It has cracks in it near the top and there is evidently danger of a collapse and fall at any time. It will require \$3,000.00 to replace it.

### SUMMARY OF APPROPRIATIONS.

Ordinary fund, including maintenance of teachers' library and printing office, \$57,000.00 annually.....	\$114,000 00
Repairs and improvements, \$3,500.00 annually.....	7,000 00
Maintenance of free circulating library for blind.....	1,000 00
1. Completion of new hospital.....	10,000 00
2. Construction of silo and machinery.....	600 00
3. New mangle for laundry.....	500 00
4. New smoke stack.....	3,000 00

### WATER SUPPLY.

During the past year an effort has been made to provide an adequate water supply for the school, but we have not yet succeeded. Every year the school is threatened with a water famine. In the fall we have to depend upon the supply furnished by the city, which is uncertain, muddy, and unfit for domestic use. A few years ago the management of the school was notified that the city could not supply water after a certain date, a few days off. The school had either to close or look elsewhere for a supply. A contract at exorbitant rates was made for water, but, fortunately, a heavy rain came to the relief.

The people of Jacksonville do not seem to be very much concerned about the water situation, and it seems useless for the State to wait longer for them to take action in the matter. It seems to me entirely feasible for the State to take steps to provide the three institutions located here with an adequate supply of pure water.

### THE ALUMNI ASSOCIATION.

The biennial meeting of the Alumni Association of this institution met at the school June 3d, and continued its session for two days. This body is made up of graduates of the school and is a strong force in the State in its advocacy of the importance of a thorough education for the blind.

The reunions have been attended with increasing numbers. There were fifty-six members present at the meeting of 1906, sixty-nine at the meeting of 1908, and at the meeting of 1910 there were eighty-two members present. We also find an increase in the prosperity of the individual members. A large percentage are earning a good living, and a goodly number are laying up money and building homes for themselves. Many have become prominent members of their community, while others have taken a very prominent part in much wider fields of usefulness. Several have been graduated in colleges and universities, and some are now taking work in these higher schools of learning.

The Jacksonville school has graduated 232 pupils, 116 girls and 116 boys. Twenty-five of the girls and seven of the boys are married.

The first graduating class was in 1877. There has been a class each year ever since, except the years 1885 and 1892.

### SAMUEL BACON.

Samuel Bacon, the founder of this school, died at his home near Nebraska City, Neb., Feb. 12, 1909. Mr. Bacon was born in Trumbull county, Ohio, March 10, 1823. He lost his sight when a mere child, and at the age of 15 was among the first pupils to enter the recently established Ohio School for the Blind, where he pursued his studies with great success as a student. Later he completed his education at Kenyon college. He came to Morgan county in 1847, and, learning that this State had no school for the blind, set out with much zeal to induce the public to see the need of such an institution. So successful were his efforts, that a school was opened in Jacksonville in June, 1848, with four pupils. These pupils and their work were exhibited before the Legislature in January, 1849, which resulted in the passage of an act establishing this school and appropriating funds for its maintainance. In 1850 he resigned as superintendent of the school, and two years later established another school in Iowa. It was largely through his influence that the Nebraska School for the Blind was established in 1874.

Mr. Bacon was a man of rare gifts and led a remarkably useful and successful life. The three schools he established for the blind and the enlightenment and comfort they are bringing into the world are enduring monuments to his worth as a citizen of the republic.

### PRINTING HOUSE FOR THE BLIND.

The American Printing House for the Blind, located at Louisville, Ky., is the largest institution of its kind in the world. It was established by some of the philanthropic people of Kentucky about fifty years ago, with the assistance of that State and other states of the Union, which made appropriations for its support. This support was not always to be depended upon and efforts were early put forth to get National aid. After much agitation of the subject Congress, in 1879, made provision for devoting \$10,000.00 annually for thirty years. This provision, through the efforts of Col. Cowan, the president of the board of trustees, and Supt. Hutton was made perpetual by Congress in 1908.

The fund is prorated in books among the schools of the country and this State has shared in the distribution. We receive for books \$485.00, or about \$2.20 annually for each pupil. This does not afford sufficient books, and many of the states have found it necessary to establish printing offices of their own to supply their wants. Books for the blind cost many times as much as those for the seeing. It is therefore plain that \$2.20 per capita for each pupil is too small for their requirements, for text books alone, to say nothing of the books on general literature, which are also furnished from this fund.

### THE BLIND IN ILLINOIS.

The number of blind reported in Illinois by the census of 1900 was 3,767, or one to every 1,182 of the population. Illinois has less blindness

than any other State touching its borders, except Wisconsin, which has about the same. Illinois has 7 per cent less blindness than the country as a whole. In the United States there is one blind person to 1,182 of the population, while in Illinois there is one to 1,272. Census figures indicate that about 10 to 12 per cent of the blind are under 20 years of age, that is, of school age. The number of school age in Illinois was shown to be 495.

This school, as before indicated, has enrolled during the past two years about 229. The Chicago public schools have enrolled during that time not to exceed 35, making 264 pupils under instruction, or only a fraction over one-half of all those reported to be under 20 years of age in this State. Mr. Allen, of the Perkins Institution in Boston, once estimated that one-sixth of those of school age were feeble-minded. This would account for 80 of the 230 out of school, as we do not admit children thus afflicted. If we estimate those who are too young or otherwise incapacitated to attend school at 80, there yet remain 70 more to account for. It is believed that fully this number of blind boys and girls are out of school and are being deprived of the advantage of an education. One reason for this is that so many people do not know of the existence of the school, or possess wrong impressions of its aims and purposes. It is the too general belief of those who know of it, that it is a home or hospital associated with charity and pauperism, rather than with schools supported by the State, as are all of the public schools.

I have no doubt if the proper effort were put forth to locate blind children and explain the advantages of the school, the attendance could be increased by fifty at least. In New York a few years ago a special census for the blind was made and 150 children eligible to the school were discovered who had never been enrolled in any school.

Two years ago we asked for a census of the blind for this State, but this was not looked upon with favor by the Legislature, although specially called to its attention by Governor Deneen. I earnestly hope that this session will give the school for the next two years \$2,000.00 to pay the salary and expenses of an agent to go over the State locating blind children and explaining to the parents the aims and purposes of the school. Other states are doing this, and it is very important that Illinois should take similar action that all the blind children may be brought into school.

#### REPORTS OF THE PHYSICIAN AND OCULIST.

I desire to call your attention to the reports of the physician and oculist for the past two years embodied elsewhere in this report.

The report of the oculist shows that a great amount of blindness is preventable and that a great charge is placed upon the State aside from much suffering upon the individual by ignorance and carelessness. Many are blinded by gonorrhreal infection. All such cases are preventable or curable. Sixteen of the thirty-two children in our kindergarten were thus deprived of their sight.

Another source of much blindness is trachoma or granular lids. Eight or nine per cent of the pupils admitted to the school during the last

twenty years have become blind from the effects of this disease. Trachoma is contagious, and is especially prevalent among the white inhabitants of central and southern Illinois. The negroes are practically immune, but the disease is ravaging the white people of the states just south of us. It is a most frequent cause of blindness in Kentucky, Tennessee and Arkansas. The oculist of the Arkansas school for the blind says it causes 80 per cent of the blindness of the pupils in that school. The disease is easily curable if taken in time by a competent oculist. There should be some means of informing the public of the character of the disease and the precautions necessary to its prevention.

An examination of the records of the school shows that of 748 cases of blindness admitted, 114 were caused by accident. Of these cases, 62 came from sympathetic ophthalmia. This occurs when one eye has been injured and the sight destroyed. The sight in such cases may be preserved in the uninjured eye by the removal of the injured one. But parents and people generally are so loath to disfigure a child by the removal of a worthless eye, that they take the chance, and total blindness often occurs where the sight of one eye might have been saved. In one-half the cases of injury to one eye, the sight of both is lost, which might be prevented by removal of the injured one. Nearly 9 per cent of the pupils admitted since 1894 have become totally blind from this neglect.

When the people come to the point where they will consult competent specialists in eye diseases when they or their children suffer from eye trouble, blindness will be reduced by 40 per cent.

I wish to acknowledge the uniform kindness and courtesy shown by the officers, teachers and employés and the earnestness and zeal they have displayed in their work. This, with the cordial coöperation and support of the board of trustees and the Board of Administration, has made the two years' work most profitable and pleasant.

G. W. JONES,  
*Superintendent.*

## PHYSICIAN'S REPORT.

---

JACKSONVILLE, ILL., Aug. 25, 1910.

*Mr. George W. Jones, Superintendent, Illinois School for the Blind, City:*

DEAR SIR—The following is a brief report of the health conditions at the School for the Blind during the two years just passed.

The following cases were cared for in the hospital:

INJURIES.			
Fracture of clavicle.....	2	Influenza.....	3
Dislocation of right ankle.....	1	Epistaxis.....	1
Injury to right foot (cut by glass).....	1	Hysteria.....	2
Sprain of left shoulder.....	1	Erysipelas.....	2
Incomplete fracture of radius (left).....	1	Appendicitis.....	5
GENERAL SICKNESS.		Nephritis.....	3
Brain tumor.....	4	Cephalgia.....	1
Indigestion.....	38	Specific disease.....	1
Acute rhinitis.....	43	Laryngitis.....	6
Tonsillitis.....	107	Scarlet fever.....	2
Infections (septic).....	7	Varicella.....	8
Herpes zoster.....	1	Measles.....	2
Articular rheumatism.....	9	Neuralgia (facial).....	7
Pharyngitis.....	13	Dysmenorrhoea.....	2
Pleurisy.....	2	Malaria.....	8
Amenorrhoea.....	3	Eezema.....	7
Neurasthenia.....	6	Erythema.....	2
Congenital heart disease (defective interventricular septum with stenosis of pulmonary valve).....	1	Anemia.....	1
		Epilepsy.....	2
		Seabies.....	4
		Tachyeardia (anemic).....	1
		Pneumonia.....	2
		Otitis media.....	1
		Incipient tuberculosis (pulmonary).....	1
		Total.....	318

These were all discharged much improved or recovered with the exception of the four cases of brain tumor. Two of these cases were sent home. The news of the death of one of them was received later.

Katherine Kauckle and Etta Henderson, two well advanced tumor cases, were brought to the hospital in an unconscious condition. Katherine entered the hospital Jan. 27, 1910, and died from pressure symptoms Feb. 12th. Etta was brought to hospital April 20th in a comatose condition, which became more profound until the following day, when she passed away. No report has been received from the other brain tumor case sent home. Would suggest that no case of well advanced brain tumor be admitted to the institution, as they are not in condition to do school work and are a continuous hospital charge which will eventually prove fatal.

The ease of ineipient pulmonary tuberculosis was sent home as soon as positive diagnosis was made.

Children of rheumatic and strumous diathesis are especially prone to develop tonsilitis. There were many cases, mostly of the follicular type. During the school year 1908-09 there were eighty eases. During 1909-10 there were twenty-seven eases. I believe the decrease in the number of eases can be attributed to improved conditions of sleeping apartments, not crowding dormitories, and having all eases of irritable throats report at once to hospital for treatment.

A start has been made towards the construction of a hospital, but on account of lack of funds the work had to be temporarily abandoned. As far as constructed, it is first class in every respect except the plumbing. It will accommodate ten patients. This is good as far as it goes, but is wholly inadequate.

The hospital is by far the most important department of the institution and should have the best equipment obtainable.

I recommend that an appropriation of \$10,000.00 be asked for to complete the start that has been made. By all means let us have a modern hospital completed at the earliest possible date. Then we will be in a position to meet any emergencies or epidemics that may arise and compare favorably with other institutions of the State.

I thank you for the courtesy and coöperation extended me.

Very respectfully,

GEO. E. BAXTER.

## AMERICAN BRAILLE.

To write on a Braille tablet begin at the right ; to read, reverse the sheet and begin at the left. In either case the six points (⠃⠃⠃) of which the characters are formed, are numbered from the top, 1, 2, 3, for the first vertical row, and 4, 5, 6, for the second.

## ALPHABET.

a	b	c	d	e	f	g	h	i	j	k	l	m
•	•	••	••	•	••	••	••	•	••	••	•	••
•	•	••	••	•	••	••	••	•	••	••	•	••
n	o	p	q	r	s	t	u	v	w	x	y	z
•	•	••	••	••	•	•	•	•	••	••	•	••
•	•	••	••	••	•	••	••	•	••	••	•	••

To capitalize a letter prefix to it points 3 and 6 (..).

## MARKS OF PUNCTUATION.

A horizontal row of Braille characters, including punctuation marks such as a question mark, an exclamation point, a dash, and parentheses, along with double quotes and a single quote.

The apostrophe is point 4. The other marks, except the exclamation, are formed of points 2, 3, 5 and 6.

When two or more initial letters requiring the capital sign occur together, the space which separates words may be omitted; the period which follows the first letter then becomes also the prefix, or capital sign, for the next; thus,      : . . .      F. R. S.

## NUMERALS.

When alone or in combination the following letters, if prefixed by the numeral sign ( . : ), become numbers.

I	2	3	4	5	6	7	8	9	○
.	•	••	•••	•	••	•••	••••	•••••	••••••
I	•••	46	••••••	235	•••	•••••	••••••	•••••••	••••••••

## INITIAL LETTERS USED AS WORD SIGNS.

but could down from great have just know like my  
not quite right should the under very will you

When the above word ; are parts of other words the initial letter must not be used as a representative ; e.g. ; • when standing alone represents "know," but "knowledge" should be written

## OTHER CHARACTERS USED AS WORD AND PART WORD SIGNS.

The following characters, with one exception, are formed of points 2, 3, 5, 6. When separated from words by the omission of a cell, they are word signs, as follows:

had their to was with would  
.. .. : .. .. .. :

The letter x ( $\ddot{\cdot}\ddot{\cdot}$ ) when standing alone is used as an asterisk.

The letter d followed by a period · · · is used as the dollar sign and should be immediately followed by the numeral sign; thus—

... : . . . . . \$23.75

An italicized word is indicated by the prefix of point 6 ( ).

Lines of poetry are separated by the omission of three cells.

The capital sign preceding a contraction capitalizes only the first letter of the contraction.

The ordinary rules of grammar should be closely followed; hence correct syllabication must be observed, and a monosyllable should never be divided.

Strict conformity to general grammatical laws and the special rules preceding, are essential to a correct use of the American Braille, and the use of signs in any other way than that hereby authorized is as inelegant and incorrect as similar changes in ordinary writing.

## EXAMPLE OF WRITING WITH CONTRACTIONS.

The y had ch o s en their w or k : on e was an ar t i st ; an o th ei  
 ex c e l led in m u s ic ; and the y ou n g e st was er r and b o y  
 for W . A . H o l t & C o . , 9 D a y St . , wh er e h e  
 ear ned \$ 4 . 5 o per w e e k . Not quite s o g i f t ed  
 a s h is b r o th er s , h e p o s s e ss ed , like th e m , a  
 s a v o i r f a i r e which m a d e h i m a great f a vor it e  
 with a l l . He could t u rn h is h and to an y th ing and h is
